# Cyber Defense Challenge for Teens

Teens, come to the Civic Center Library and learn about a career in computer science and cybersecurity!

Wednesday, June 14, 2017
10:30 am - 12:00 pm or 1:00 pm - 2:30 pm
1188 S. Livermore Ave.

Join us for a fun activity that will challenge you and build your skills in cybersecurity. You will participate with a teammate to solve 8 - 10 challenge problems that are unified through a storyline. This activity will develop familiarity with tools such as Firefox, Wireshark, gdb, python, and pattern/logic skills. The challenges will have several levels of difficulty to support a wide range of participants. Evi Dube and Celeste Matarazzo, with several LLNL Cyber Defender student interns from Lawrence Livermore National Laboratory, will run this event and serve as mentors and technical support during the event.

Patrons in middle and high school are welcome to participate. Registration is required for this free program. To sign up, please come to the Youth Room Information Desk at the Civic Center Library or call 925-373-5504. Sign-ups begin on Monday, May 15, 2017. There are two identical time slots to choose from. Parents will be encouraged to sign a photo waiver for their teen.
